Capstone Projects

***The materials will be accessible as each topic is completed in the live class**

This course challenges you to embark on comprehensive, end-to-end data analytics projects that mirror the complexities and nuances of real-life scenarios. You'll tackle problems in various domains such as healthcare, finance, retail, or technology, using datasets that reflect current industry challenges. The course also emphasizes the importance of effective communication and storytelling with data, preparing you to present your findings to both technical and non-technical audiences.
