Power BI

***The materials will be accessible as each topic is completed in the live class**

The course will teach you how to develop dashboards from published reports, use Quick Insights to uncover deeper insights from your data, and apply practical recipes to various tasks in Power BI. You will also learn how to troubleshoot common issues in Power BI. By the end of the course, you will be equipped with the skills and knowledge needed to effectively use Power BI to solve business problems and improve operations.
